SUMMARY

As a dedicated Full Stack Developer with 3 years of hands-on experience, I have developed a strong proficiency in both front-end and back-end development. My journey has equipped me with a versatile skill set that includes working with a variety of tools and frameworks, enabling me to build and maintain dynamic, high-performance web applications. I am adept at using modern technologies and methodologies to deliver seamless and user-friendly solutions. My collaborative approach and commitment to continuous learning ensure that I consistently contribute to innovative and efficient development processes. I am eager to bring my technical expertise and creative problem-solving skills to a forward-thinking team where I can drive impactful projects and further hone my craft.

WORK EXPERIENCE

RouadTech Company: (Backend Engineer – full time)

 April 2021 – October 2021  United Arab Emirates

- As a Back End Engineer at RouadTech Software Company, I specialized in developing and maintaining server-side logic using the Laravel framework. My responsibilities included designing and implementing scalable and secure RESTful APIs, managing database schemas, and optimizing queries for enhanced performance.
- I collaborated closely with front-end developers to ensure seamless integration of user-facing elements with server-side logic. Additionally, I implemented authentication, authorization, and security measures to protect data integrity.

Altarek Company: (Full Stack Engineer – part time)

 March 2022 – August 2022  Egypt

- As a Full Stack Engineer at Altarek Software Company, I was responsible for developing and maintaining both the front-end and back-end of web applications.
- On the front-end, I utilized HTML, CSS, JavaScript, and jQuery to create responsive and interactive user interfaces. On the back-end, I worked with the Laravel framework to design and implement robust server-side logic, create and manage RESTful APIs, and optimize database queries for performance.

Mahrous Academy Company: (Full Stack Engineer – full time)

 September 2022 – June 2023  Saudi Arabia

- I specialized in creating comprehensive graduation website projects for students. My responsibilities included collaborating with clients to understand their requirements, designing user-friendly interfaces, and implementing responsive, secure, and dynamic web applications using modern technologies such as HTML, CSS, JavaScript, and various backend frameworks.
- I also conducted thorough testing and debugging to ensure optimal performance and reliability, as well as provided ongoing support and updates post-launch. This role honed my skills in project management, client

communication, and teamwork, while allowing me to contribute to the academic and professional growth of students through innovative digital solutions.

Softify Company: (Full Stack Engineer – full time)

 September 2023 – April 2024  Egypt

- I was responsible for developing and maintaining both the front-end and back-end of web applications. On the front-end, I utilized HTML, CSS, tailwind, JavaScript, and React to create responsive and interactive user interfaces.
- On the back-end, I worked with the Laravel framework to design and implement robust server-side logic, create and manage RESTful APIs, and optimize database queries for performance. My role required close collaboration with cross-functional teams to ensure seamless integration of user-facing elements with server-side operations.

EDUCATION

 2017-2021 Bachelor's degree in Computer Science
Faculty of Computing and Information of Zagazig University.

Skills

Front End:

- HTML CSS
- JavaScript TypeScript JQuery
- React Next JS Redux Toolkit
- Vue Nuxt JS Pinia
- Responsive Design: Media Queries, Flexbox, Grid
- Styling Libraries: Tailwind CSS, Bootstrap, Material UI
- CSS Preprocessors: Sass
- Testing: Jest
- Version Control: Git, GitHub, GitLab
- API Integration: Axios, React Query, Fetch API

Back End:

- Languages: PHP, JavaScript
- Frameworks: Laravel, Node.js
- Databases: MySQL, MongoDB
- Version Control: Git, GitHub, GitLab
- API: REST, RESTFUL, GraphQL
- Testing: PHPUnit, Junit
- DevOps: Docker, Kubernetes
